                                                                                                                                                                                                                                                                                                                         The invention comprises antisense oligonucleotides which are designed to inhibit the expression of the kinase suppressor of Ras (KSR) gene. The antisense oligonucleotides of the invention are useful for treating or inhibiting the progression of cancer, such as: pancreatic cancer, lung cancer, skin cancer, urinary tract cancer, bladder cancer, liver cancer thyroid cancer, colon cancer, intestinal cancer, breast cancer, ovarian cancer, stomach cancer, head and neck cancer, because cancer, cancer, lung prostate cancer, leukaemia, lymphoma, and neuroblastoma. The present DNA sequence represents a human KSR-specific oligonucleotide that was used in an example of the invention.
                                                                                                                                                                                                                                                                                         Sequence 18
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    New antisense oligonucleotides complementary to a region of kinase suppressor of Ras (KSR) RNA which inhibit KSR expression, useful for treating or inhibiting progression of cancer, e.g. pancreatic, lung, skin, or bladder cancer.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Example 2; SEQ ID NO 15; 120pp; English.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      The invention comprises antisense oligonucleotides which are designed to inhibit the expression of the kinase suppressor of Ras (KSR) gene. The antisense oligonucleotides of the invention are useful for treating or inhibiting the progression of cancer, such as: pancreatic cancer, lung cancer, skin cancer, urinary tract cancer, bladder cancer, liver cancer, thyroid cancer, colon cancer, intestinal cancer, breast cancer, ovarian cancer, stomach cancer, head and neck cancer, osophageal cancer, prostate cancer, leukaemia, lymphoma, and neuroblastoma. The present DNA sequence represents a human KSR-specific antisense oligonucleotide of the

Example 2; SEQ ID NO 15; 186pp; English

cc sequence substantially complementary to nucleotides (14) comprising a sequence of mouse KSR or nucleotides 97-216 of human KSR or its portion; an antisense oligonucleotide (V) comprising a sequence chosen from ARA4539, ARA6540 and ARA6541, and; a recombinant DNA molecule (VI) comprising a nucleic acid sequence with encodes on transcription and antisense NAA complementary to memmalian KSR RNA or its portion; a cell (VII) transfected with (VII); an expression vector (VI) capable of expressing a nucleic acid which is substantially complementary to the coding sequence of KSR RNA, or its portion/fragment, where the oligonucleotide/nucleic acid inhibits the expression vector (VI) capable of KSR RNA, or its portion/fragment, where the coding sequence of KSR RNA, or its portion/fragment where the coding memmalian KSR and which is substantially complementary to the CSR RNA, or its portion/fragment, where the coding sequence of KSR, and, or its portion/fragment, where the coding sequence of KSR, and, or its portion/fragment, where the coding sequence of CSR RNA, or its portion/fragment, where the cligonucleotide which is the coding sequence of compression of KSR, a pharmaceutical composition (PCI) comprising (I) and a carrier or diluent, a composition (CI) comprising one or more chemotherapeutic or radiotherapeutic agent and an oligonucleotide which is targeted to a mRNA coding memmalian KSR and which inhibits the expression; a composition or radiotherapeutic or substantially complementary to the coding sequence of KSR RNA, or its portion/fragment, where the nucleic acid which is composition of KSR; treating or preventing (MZ) a portion of the mRNA encoding KSR; treating or preventing (MZ) a preventing (MZ) a preventing (MZ) a preventing to the mammal acomposition of mammalian KSR protein, inhibits the expression of Ras i The invention relates to an oligonucleotide (I) which is substantially complementary to a region of kinase suppressor of Ras (KSR) RNA, where the oligonucleotide inhibits the expression of KSR. Also included are the following: an oligonucleotide (II) which is substantially complementary to a translation initiation site, 5' untranslated region, coding region or 3' untranslated region of mRNA encoding mammalian KSR; an antisense oligonuclectide (III) comprising a sequence substantially complementary to the CA1 region of KSR; an antisense oligonuclectide (IV) comprising the expression of mammalian KSR protein or a vector expressing mammalian KSR; identifying compounds or agents which inhibit the expression of KSR by incubating a cell expressing KSR in the presence and absence of a angiogenesis in a mammal comprising administering to a mammal a therapeutically effective amount of a compound or agent which activates

(I) Is useful for inhibiting angiogenesis in a mammal. (I) Is useful for inhibiting or reducing VEGF expression or activity in a mammal. The methods are useful for treating or preventing hyperproliferative condition associated with expression of gf-Ras or heightened expression of Ras in a mammal and for treating or inhibiting the progression of cancer in a mammal. The cancer is chosen from pancreatic cancer, lung cancer, skin cancer, urinary tract cancer, bladder cancer, liver cancer, thyroid cancer, colon cancer, intestinal cancer, ovarian cancer, stomach cancer, esophageal cancer and prostate cancer. The present sequence represents a KSR antisense oligonucleotide.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Kinase suppressor of Ras (KSR) antisense oligonucleotide,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         candidate compound or agent, and detecting or measuring the expression of KSR in the presence and absence of a candidate compound or agent, where a decrease in the expression of KSR in the presence of the candidate compound or agent versus in the absence of the candidate compound or agent indicates that the compound or agent inhibits the expression of KSR agent indicates that the compound or agent inhibits the expression of KSR and a ribozyme that cleaves KSR mRNA. (I) Is useful for inhibiting the expression of mammalian KSR comprising contacting cells which express KSR with (I), where expression of mammalian KSR is inhibited. (I) Is useful

New oligonucleotide inhibiting kinase suppressor of Ras (KSR) expression, useful for inhibiting expression of mammalian KSR and treating

밁 S

> ovarian cancer. hyperproliferative conditions such as lung cancer, skin cancer, and

7; SEQ ID NO 5; 186pp; English

C sequence of mouse KSR cor huclectudes 9/-216 of numan KSR cor its portion; an artisense cligonolectide (VI) comprising a sequence chosen from comprising a nucleic acid sequence which encodes on transcription and relations of the motivation of the comprising a nucleic acid sequence which encodes on transcription and relations of the comprising and comprising of the coding sequence of KSR kNA could be presented to the coding sequence of KSR kNA which is expression in the coding sequence of KSR kNA which is expression of KSR; and composition (VI) comprising of the coding sequence of KSR kNA which is purticular transcription of KSR; and composition (VI) comprising (I) and a carrier or diluent, a composition (CI) comprising on an injunct code inhibite the expression of KSR; and coding mammalian KSR and which inhibits KSR expression; a composition (CI) comprising on a coding sequence of KSR kNA, or its portion/fragment, where the coding sequence of KSR kNA, or its composition (CI) comprising (I) and a carrier or diluent, where the coding sequence of KSR kNA, or its conclusion weeter is capable of expression inhibite the expression; a composition (CI) comprising (I) and a carrier or diluent, where the coding sequence of KSR kNA, or its conclusion weeter is capable of expression inhibite the expression of KSR; and which inhibits KSR expression; a composition (CI) comprising uncleic acid which is complementary to a portion of the expression of kRS; inhibiting (NI) the expression of mammalian KSR comprising contacting contacting contacting contacting an expression of the coding sequence of KSR; inhibiting the expression of the mammalian KSR comprising dominant trailing to the mammal comprising dominant trailing contacting to the mammal comprising dominant trailing contacting to the mammal comprising dominant trailing contacting to the mammal comprising that the expression of mammalian KSR protein; trailing to the mammalian KSR protein or a weater expression of the mammalian KSR protein; stimulating creditions of the ex to the CA1 region of KSR; an antisense oligonucleotide (IV) comprising a sequence substantially complementary to nucleotides 124-243 of the coding sequence of mouse KSR or nucleotides 97-216 of human KSR or its portion; to a translation initiation site, 5' untranslated region, coding region of 3' untranslated region of mRNA encoding mammalian KSR; an antisense oligonucleotide (III) comprising a sequence substantially complementary to the CA1 region of KSR; an antisense oligonucleotide (IV) comprising The invention relates to an oligonucleotide (I) which is substantially complementary to a region of kinase suppressor of Ras (KSR) RNA, where the oligonucleotide inhibits the expression of KSR. Also included are titollowing: an oligonucleotide (II) which is substantially complementary cancer in a mammal. The the

The invention relates to an oligonucleotide (I) which is substantially complementary to a region of kinase suppressor of Ras (KSR) RNA, where the oligonucleotide inhibits the expression of KSR. Also included are the following: an oligonucleotide (II) which is substantially complementary

Claim 8;

SEQ ID NO 28; 186pp; English.

to a translation initiation site, 5' untranslated region, coding region or 3' untranslated region of mRNA encoding mammalian KSR; an antisense

oligonucleotide (III) comprising a sequence substantially complementary to the CA1 region of KSR; an antiense oligonucleotide (IV) comprising a sequence substantially complementary to nucleotides 124-24 of the coding sequence of mouse KSR or nucleotides 97-216 of human KSR or its portion;

ce cells which express Make with a nucleic acid which is complementary to a computencial (M2) and control of the mRNA encoding KSR, treating or preventing (M2) a hyperproliferative condition associated with the expression of gf-Ras or cell heightened expression of Ras in a mammal comprising administering to the associated with the expression of gf-Ras or protein; treating or preventing (M3) a hyperproliferative condition associated with the expression of gf-Ras or heightened expression of Ras in a mammal comprising to the mammal therapeutically effective amount of a nucleic acid which is complementary to a portion of the mRNA encoding KSR, treating or inhibitistering to a mammal a compound or agent which inhibits the expression of cancer in a mammal comprising calministering to a mammal a compound or agent which inhibits the expression of mammalian KSR protein; inhibiting or reducing to the expression of mammalian KSR protein; inhibiting or reducing to agent that inhibits the expression of mammalian KSR protein; stimulating or reducing trace expression of mammal comprising administering to a mammal a compound or agent which national activates the expression of mammal activates of a candidate compound or agent which inhibit the expression of KSR, in the presence and absence of a candidate compound or agent which activates agent inhibiting a cell expression of KSR in the presence of the candidate compound or agent which activates agent which activates agent which inhibit the expression of KSR, in the presence of the candidate compound or agent which activates and a ribozyme that cleaves KSR mRNA. (I) Is useful for inhibiting the expression of faminialian KSR comprising or adiation in tumor cells in a mammal
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  CC Comprising a nucleic acid sequence which encodes on transcription and applicated (VI) comprising a nucleic acid sequence which encodes on transcription and antisense RNA complementary to mammalian KSR RNA or its portion; a cell CC (VII) transfected with (VI); an expression vector (VI) capable of coding sequence of KSR RNA, or its portion/fragment, where the coligonucleotide/muclest acid which is substantially complementary to the coligonucleotide/muclest acid inhibits the expression of KSR; an composition of the coding sequence of KSR RNA, or its portion/fragment, where the oligonucleotide which is substantially complementary to the CA1 region of the coding sequence of KSR RNA, or its portion/fragment, where the oligonucleotide which is substantially complementary to the CA1 region of the coding sequence of KSR RNA, or its portion/fragment, where the oligonucleotide inhibits the expression of KSR; a pharmaceutical composition (PC1) comprising (I) and a carrier or diluent; a composition (C1) comprising (I) and a carrier or diluent; a composition (C2) comprising one or more chemotherapeutic or composition (C3) comprising an expression vector and a carrier or diluent, where the expression vector and a carrier or diluent, where the coding sequence of KSR RNA, or its portion/fragment, where the nucleic acid inhibits the expression of KSR; inhibiting (M1) the expression of mammalian KSR comprising contacting cells which express KSR with a nucleic acid which is complementary to a nortice of which is complementary to the coding sequence of KSR RNA, or its portion/fragment, where the nucleic acid inhibits the expression of KSR; inhibiting (M1) the expression of mammalian KSR comprising contacting cells which is expression and a carrier or diluent.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  an antisense oligonucleotide (V) comprising a sequence chosen from AEA46539, AEA46540 and AEA46541, and ; a recombinant DNA molecule
                                                                                                   ovarian cancer, stomach cancer, The present sequence represents

The invention relates to an oligonucleotide (I) which is substantially CC complementary to a region of kinase suppressor of Ras (KSR) RNA, where the oligonucleotide inhibits the expression of KSR. Also included are the CC following: an oligonucleotide (II) which is substantially complementary to a translation initiation site, 5 untranslated region, coding region (CC or 3' untranslated region of mRNA encoding mammalian KSR; an antisense CC oligonucleotide (III) comprising a sequence substantially complementary to the CA1 region of KSR; an antisense oligonucleotide (IV) complementary CC to the CA1 region of KSR; an antisense oligonucleotide (IV) comprising a sequence substantially comprising a sequence of mouse KSR or nucleotides 97-216 of human KSR or its portion; CC sequence of mouse KSR or nucleotides 97-216 of human KSR or its portion; CC an antisense oligonucleotide (V) comprising a sequence chosen from CC AEA46539, AEA46540 and AEA46541, and; a recombinant DNA molecule (VI) CC comprising a nucleic acid sequence which encodes on transcription and CC (VII) transfected with (VI); an expression vector (VI) capable of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      New oligonucleotide inhibiting kinase suppressor of Ras (KSR) expression, useful for inhibiting expression of mammalian KSR and treating hyperproliferative conditions such as lung cancer, skin cancer, and
                  expressing a nucleic acid which is substantially complementary to coding sequence of KSR RNA, or its portion/fragment, where the oligonucleotide/nucleic acid inhibits the expression of KSR; an

product= "Mouse kinase suppressor of Ras (KSR)"

WO2005056756-A2

23-JUN-2005

```
CC expression vector (V2) capable of expressing an oligonuclectide which is capable of expressing an oligonuclectide which is CC substantially complementary to the CA1 region of the coding sequence of CC KSR RNA, or its portion/iragment, where the oligonuclectide inhibits the capable of expression of KSR; a pharmaceutical composition (PC1) comprising (I) and carrier or diluent; a composition (C2) comprising one or more chemotherapeutic or CC diluent; a composition (C2) comprising one or more chemotherapeutic or cardiotherapeutic agent and an oligonucleotide which is targeted to a mRNA CC encoding mammalian KSR and which inhibits KSR expression; a composition (C2) comprising an expression vector and a carrier or diluent, where the coding sequence of KSR RNA, or its gortion of transpent, where the nucleic acid inhibits the expression of KSR; transpention of KSR comprising contacting (C2) comprising (M1) the expression of mammalian KSR comprising contacting (C2) comprising (M1) the expression of mammal comprising doministering to a portion of the mRNA encoding KSR; treating or preventing (M2) a hyperproliferative condition associated with the expression of gf. Ras or heightened expression of Ras in a mammal comprising administering to the mammal therapeutically effective amount of a nucleic acid which is complementary to a portion of the mRNA encoding KSR; treating or capable or expression of tumor (C2) inhibits the expression of mammalian KSR protein; inhibiting angiogenesis of tumor (C3) expression of activity in a mammal, by administering to the mammal comprising and protein; inhibits the expression of KSR. (and in the protein of mammalian KSR protein, inhibits the expression of tumor or agent which inhibits the expression of KSR. (and in a mammal) a compound or agent which activates the expression of mammalian KSR protein, inhibiting a compound or the expression of KSR. (and in a mammal) and compound or agent which inhibits the expression of KSR. (and in a mammal) and compound or agent which inhibits the expre
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         to a translation initiation site, 5' untranslated region, coding region or 3' untranslated region of mRNA encoding mammalian KSR; an antisense oligonucleotide (III) comprising a sequence substantially complementary to the CA1 region of KSR; an antisense oligonucleotide (IV) comprising a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 New oligonucleotide inhibiting kinase suppressor of Ras (KSR) euseful for inhibiting expression of mammalian KSR and treating hyperproliferative conditions such as lung cancer, skin cancer,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             expressing a nucleic acid which is substantially complementary to the coding sequence of KSR RNA, or its portion/fragment, where the oligonucleotide/nucleic acid inhibits the expression of KSR; an
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    AEA46539, AEA46540 and AEA46541, and, a recombinant DNA molecule (VI) comprising a nucleic acid sequence which encodes on transcription an antisense RNA complementary to mammalian KSR RNA or its portion; a cell (VII) transfected with (VI); an expression vector (VI) capable of
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  sequence substantially complementary to nucleotides 124-243 of the coding sequence of mouse KSR or nucleotides 97-216 of human KSR or its portion; an antisense oligonucleotide (V) comprising a sequence chosen from
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The invention relates to an oligonucleotide (I) which is substantially complementary to a region of kinase suppressor of Ras (KSR) RNA, where the oligonucleotide inhibits the expression of KSR. Also included are the following: an oligonucleotide (II) which is substantially complementary
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       03-DEC-2004; 2004WO-US040506

Ś CC KSR in the presence and absence of a candidate compound or agent, where a CC decrease in the expression of KSR in the presence of the candidate CC compound or agent versus in the absence of the candidate compound or agent indicates that the compound or agent inhibits the expression of KSR compound or agent inhibits the expression of KSR CC expression of mammalian KSR compound in the candidate compound or gent inhibits the expression of KSR CC with (1), where expression of mammalian KSR is inhibited. (1) Is useful for conferring radiosensitivity to ionizing radiation in tumor cells in a CC mammal. (1) Is useful for inhibiting angiogenesis in a mammal. (1) Is useful for mammal. (2) Is useful for inhibiting angiogenesis in a mammal. (3) Is useful for inhibiting angiogenesis in a mammal. (4) Is useful for treating or preventing common com 밁 RESULT 10 Query Match .Best Local S Matches 18 Isolated kinase suppressor of ras protein - used to identify lead compounds and in diagnosis or treatment of disease associated with 13-DEC-1995; WO9721820-A2 Cus Mouse Ksr-1 (kinase suppressor of Ras) cDNA. 13-SEP-1997 AAT72155; AAT72155 standard; cDNA; 4094 BP Sequence 4034 BP; Rubin G, 13-DEC-1996; 19-JUN-1997 Mus musculus Kinase (REGC ) UNIV CALIFORNIA 1997-332791/30 se suppressor of Ras; Ksr-1; signal transduction; cell growth; differentiation; gene therapy; diagnosis; ds. 296 CGGACCCTAGAGGCAAAG 313 18; Similarity AAW19918 CGGACCCTAGAGGCAAAG 18 ဝူ Therrien M, Ksr signal Conservative (first entry) 95US-00571758. 96WO-US019941.                                              The invention comprises antisense oligonucleotides which are designed to inhibit the expression of the kinase suppressor of Ras (KSR) gene. The antisense oligonucleotides of the invention are useful for treating or inhibiting the progression of cancer, such as: pancreatic cancer, lung cancer, skin cancer, urihary tract cancer, bladder cancer, liver cancer, thyroid cancer, colon cancer, intestinal cancer, breast cancer, ovarian cancer, stomach cancer, head and neck cancer, oesophageal cancer,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               protein kinase involved in the regulation of cell growth and differentiation. It was isolated from a mouse PCC4 teratocarcinoma cell line with a probe corresponding to hb, a sequence that had been identified as showing similarity to Drosophila melanogaster Ksr (see als AAT72153). Drosophila virilis and human Ksr sequences (see also AAT72154 AAT82156-57) have also been identified. These Ksr homologues define a novel class of kinases related to raf kinases. Ksr mucleic acids can be used to produce Ksr polypeptides, as probes to identify mutant Ksr alleles associated with disease, and in gene therapy applications
                                                                                                                                                                                                                                                                          Example 1;
                                                                                                                                                                                                                                                                                                                              New antisense oligonucleotides complementary to a region of kinase suppressor of Ras (KS) RNA which inhibit KSR expression, useful for treating or inhibiting progression of cancer, e.g. pancreatic, lung, skin, or bladder cancer.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 30-MAY-2002; 2002US-0384228P

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                á
The invention relates to an oligonuclectide (I) which is substantially complementary to a region of kinase suppressor of Ras (KSR) RNA, where CC the oligonuclectide inhibits the expression of KSR. Also included are the Cf following: an oligonuclectide (II) which is substantially complementary to a translation initiation site, 5' untranslated region, coding region CC or 3' untranslated region of mRNA encoding mammalian KSR; an antisense CC oligonucleotide (III) comprising a sequence substantially complementary to the CA1 region of KSR; an antisense oligonucleotide (IV) comprising a sequence substantially complementary to nucleotides 124-243 of the coding CC sequence of mouse KSR or nucleotides 97-216 of human KSR or its portion; CC an antisense oligonucleotide (V) comprising a sequence chosen from CC AEA46539, AEA46540 and AEA46541, and; a recombinant DNA molecule (VI) comprising a nucleic acid sequence which encodes on transcription an CC comprising a nucleic acid sequence which encodes on transcription an antisense RNA complementary to mammalian KSR RNA or its portion; a cell (VII) transfected with (VI); an expression vector (VI) capable of expressing a nucleic acid which is substantially complementary to the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ÖS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Matches
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Query Match

CC angiogenests in a mammal comprising administrating the expression of mammal and the expression of a mammal and the expression of a compound or agent which activates CC the expression of mammalian KSR protein or a vector expressing mammalian CC KSR; identifying compounds or agents which inhibit the expression of KSR, CC by incubating a cell expressing KSR in the presence and absence of a candidate compound or agent, and detecting or measuring the expression of KSR. CC candidate compound or agent, and detecting or measuring the expression of KSR in the presence of the candidate compound or agent versus in the absence of the candidate compound or agent indicates that the compound or agent inhibiting the expression of KSR in the presence of the candidate compound or agent indicates that the compound or agent inhibiting the capturession of mammalian KSR comprising contacting cells which expression of KSR with (1), where expression of mammalian KSR is inhibited. (1) Is useful for conferring radiosensitivity to ionizing radiation in tumor cells in a CC mammal. (1) Is useful for inhibiting angiogenesis in a mammal. (1) Is useful for inhibiting or reducing VEGF expression or activity in a CC useful for inhibiting or reducing VEGF expression of gf-Ras or the progression of cancer in a mammal and for treating or inhibiting CC the progression of Ras in a mammal and for treating or inhibiting CC the progression of cancer, skin cancer, urinary tract cancer, breast CC cancer, leverent all prophoma, neuroblastoma, head and neck cancer, breast CC cancer, orarian cancer, stancer, esonbaceal cancer and prostate
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 CC (C3) comprising an expression vector and a carrier or diluent, where the CC expression vector is capable of expressing nucleic acid which is cubstantially complementary to the coding sequence of KSR RNA, or its portion/fragment, where the nucleic acid inhibits the expression of KSR; Cinhibiting (M1) the expression of mammalian KSR comprising contacting (C1) inhibiting (M2) the expression of mammalian KSR complementary to a contion of the mRNA encoding KSR; treating or preventing (M2) a portion of the mRNA encoding KSR; treating or preventing (M2) a hightened expression of Ras in a mammal comprising administering to the mammal a compound or agent which inhibits the expression of mammalian KSR protein; treating or preventing (M3) a hyperproliferative condition associated with the expression of Ras in a mammal or administering to the mammal therapeutically effective amount of a nucleic acid which is complementary to a portion of the mRNA encoding KSR; treating or inhibiting M3) the progression of the mRNA encoding KSR; treating or
                                                                                                                                                                                                    Matches
                                                                                                                                                                                                                                                                                                Query Match
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            inhibiting (M4) the progression of cancer in a mammal comprising administering to a mammal a compound or agent which inhibits the administering to a mammal an KSR protein; inhibiting angiogenesis of tumor expression of mammalian KSR protein; to a mammal a compound or agent which calls in a mammal, by administering to a mammal a compound or reducing thibits the expression of mammalian KSR protein; inhibiting a compound or agent that inhibits the expression of mammal, by administering a compound or agent that inhibits the expression of mammalian KSR protein; simulating
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         oligonuclectide/nucleic acid inhibits the expression of KSR; an expression vector (V2) capable of expressing an oligonuclectide which is substantially complementary to the CA1 region of the coding sequence of KSR RNA, or its portion/fragment, where the oligonuclectide inhibits the expression of KSR; a pharmaceutical composition (PC1) comprising (I) and a carrier or diluent; a composition (C1) comprising (I) and a carrier or diluent; a composition (C2) comprising one or more chemotherapeutic or radiotherapeutic agent and an oligonuclectide which is targeted to a mRNA encoding mammalian KSR and which inhibits KSR expression; a composition
                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 16 BP; 1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               coding sequence of KSR RNA,

                                                                                     cc neoplastic agent. The method involves exposing cells to a Chemical agent cobe tested for anti-neoplastic activity, determining a change in cc expression of at least one gene (I) of a signature gene set, where (I) cc comprises a sequence (S) selected from 8447 sequences (given in ABL61664 to ABL70110), or is at least 95% identical to (S), where a change in expression is indicative of anti-neoplastic activity. (I) has cytostatic cativity and can be used in gene therapy. MI can be used for screening an anti-neoplastic agent, and can be used for producing a product which is the data collected with respect to the anti-neoplastic agent as a result of MI, and the data is sufficient to convey the chemical structure and/or properties of the agent. MI can be used in the treatment of cancer such as colon, breast, stomach, lung, thyroid, oesophageal, ovarian, kidney, prostate or pancreatic cancer, adenocarcinoma, carcinoma, clear cell carcinoma, neuroendocrine carcinoma, papillary carcinoma and Wilm's cumour

                                                                                                                                                                                                                                                                                                                            The present invention relates to a method (M1) for determining the subtype of leukaemia cells and whether a patient sample contains leukaemia cells. The method comprises determining the expression profile of a group of markers in a patient sample. The method is useful for determining the presence of leukaemia cells, its types or subtypes, and for the preparation of a medicament for treating leukaemia.

These can be used in the diagnosis, treatment and prevention of digestive system disorders, including cancer, Meckel's diverticulum, bacterial or parastic infections, appendicitis, Hirschsprung's disease, chronic colitis or ulcerative colitis. The present sequence is a cDNA encoding a digestive

```
The present invention relates to the isolation of novel human colon cassociated polypeptides (AAU22468-AAU22701), and the CDNA and genomic sequences encoding for them. The sequences of the invention are useful in the diagnosis, treatment, prevention and/or prognosis of disorders of the colon including colon cancer, congenital abnormalities (e.g. atresia and stenosis), bacterial and viral infections, inflammatory bowel disease (CIBD), neoplastic cell disorders (e.g. polyps and adenomas, intestinal colonitariory, malabsorption syndromes (e.g. lactose incolerance), intestinal construction and sigmoid diseases. The polynucleotides sequences of the colonitarion can also be used in gene therapy. AAS39348-AAS39581 represent coff the invention. Note: The sequence data for this pattent did not form cart of the printed specification, but was obtained in electronic format colonication from MIPO at ftp.wipo.int/pub/published_pct_sequences
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         17-NOV-2000;

                                                                                                                                                                                                                                                                                                                                                         The invention relates to an isolated nucleic acid molecule encoding a polypeptide. The nucleic acid is useful for preparing a medicament for preventing, treating or medicating a medical condition e.g. cancer, liver disorders such as hepatitis or neural disorders such as Alzheimer's disease. The present sequence represents a human cDNA encoding a novel colon related polypeptide. Note: The sequence data for this patent did not form part of the printed specification but was obtained in electronic format directly from USPTO at

The method comprises determining the expression proof a group of markers in a patient sample. The method is useful for of a group of markers in a patient sample. The method is useful for determining the presence of leukaemia cells, its types or subtypes,

                                                                                                                                                                                                                                                                                                                                                                                                       0
```

Early detection of soft tissue sarcoma comprises determining expression of a gene in a first soft tissue sample and a normal soft tissue sample and comparing the gene expression, also useful in treating soft tissue

tissue sample soft tissue

sarcoma.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         which comprises obtaining a first soft tissue sample from an individual and a normal soft tissue sample from the same or different individual, determining the expression of a gene in both samples and comparing the expression of the gene in both soft tissue samples, where a higher level of protein expression in the first soft tissue sample indicates the presence of soft tissue sarcoma. The method of the invention has cytostatic applications and may be useful for detecting soft tissue sarcoma, possibly via gene therapy or vaccine production. The nucleic acid sequences may be useful in diagnostic and screening applications. The current sequence is that of a human soft tissue sarcoma-upregulated DNA of the invention. The current sequence is not shown within the specification per se but was submitted in CD format by the inventor.
which comprises obtaining a first soft tissue sample from an individual and a normal soft tissue sample from the same or different individual, determining the expression of a gene in both samples and comparing the expression of the gene in both soft tissue samples, where a higher level of protein expression in the first soft tissue sample indicates the presence of soft tissue sarcoma.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Query Match
                                                               involves detecting a variation in a gene chosen from CACNAIC, CALCRL, CHI3L1, EGF, FGF1, GFRA1, GPR56, GPRK6, IL10RA, IL10RB, IL12RB1, KCNJ14, KCNJ1, ORCTL4, PDGFRA, SCYB14, SLC12A1, SLC12A3, TGFBR3, TMEM1, CALCR, IL17R, OSTP1, FGF6, HGF, MET, TGFB1 and VEGF, or detecting the base in a polymorphism region existing in the vicinity of any one of the genes. The invention further comprises a reagent or kit for testing secondary hyperparathyroidism in a chronic renal failure patient. This polymorphism cequence represents the polymorphism containing human CHI3L1 gene of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Testing secondary hyperparathyroidism in chronic involves detecting variation in gene chosen from EGF, FGF1, GFRAL, GFR56 and GFRK6.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       acid sequences may be useful in diagnostic and screening applications. The current sequence is that of a human soft tissue sarcoma-upregulated DNA of the invention. The current sequence is not shown within the specification per se but was submitted in CD format by the inventor.
                                                                                                                                                                                                                                                                                                                                                         The invention relates to a novel method for testing secondary hyperparathyroidism in a chronic renal failure patient. The method

                                                                                                                                                                                                                                                                                                                                                                                                                                     The present invention relates to cancer associated sequences (ADQ97025-ADQ98004). The sequences are useful for the diagnosis, prevention and/or treatment of cancer, such as leukemia and lymphoma. Note: The sequence data for this patent did not form part of the printed specification, but we shall did not formate directly from WIPO at

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence 191150 BP; 55223 A; 39036 C; 39352 G; 56412 T; 0 U; 1127 Other;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   genomic DNA of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                factor receptor alpha (PDGFRA) polypeptide. The polypeptide of the invention is a type III receptor tyrosine kinase (RTK) and may be useful for screening for a compound that may influence PDGFRA-mediated neoplasia in a mammal. The current sequence is that of the human PDGFRA wild-type
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 New isolated variant platelet derived growth factor alpha (PDGFRA) polypeptide, useful for screening for a compound useful in influencing PDGFRA-mediated neoplasia in a mammal.
                                                                                                                                                                                                                                  (BIOC-) BIOCARDIA INC
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  The invention relates to a novel isolated variant platelet derived growth
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  WPI; 2004-082052/08.

The system is useful for leukocyte expression profiling. It is particularly useful for disgnosing a disease, monitoring (rate of) progression of a disease, predicting therapeutic outcome, determining prognosis for a patient, predicting disease complications in an individual or monitoring response to treatment in an individual. The diseases include cardiac allograft rejection, kidney allograft rejection, liver allograft rejection, atherosclerosis, congestive heart failure, systemic lupus erythematosus, between the confidence of the confid

The present invention relates to diagnosing or monitoring transplant rejection, e.g. cardiac or kidney transplant rejection, in an individual comprises detecting the expression level of one or more genes. The methods, system and kits are useful in diagnosing or monitoring transplant rejection, e.g. heart, kidney, liver, pancreas, pancreatic slet, lung, bone marrow or stem cell transplant rejection, in an individual. The method is also useful in assessing the immune status of an individual. The methods are also useful in diagnosing and monitoring diseases that involve the immune system, e.g. rheumatoid arthritis, lung, bacterial or fungal infection. The present sequence represents a 50 mer oligonucleotide marker for diagnosis and monitoring of allograft

cu polymucleotide sequences. The sequences can be used in gene and protein contempy, and in vaccine production. (I) and the polypeptides encoded by them may be used in the prevention, diagnosis and treatment of diseases content and be used in the prevention, diagnosis and treatment of diseases content of the prevention, diagnosis and treatment of diseases content of the prevention of polypeptides. For content of the prevention of polypeptides or content of the activity of polypeptides content of the production of polypeptides. Additionally, (I) and its complementary contents own content of polypeptides and the presence of similar nucleic acids in samples, and content the prevention of polypeptides of similar nucleic acids in samples, and content of polypeptides encoded by (I) may be used as antigens in the production of polypeptides encoded by (I) may be used as antigens in the production of the used to down regulate expression and activity. The antibodies may also be used as diagnostic agents for detecting the presence of polymorphic contents of polypeptides may also be used as diagnostic agents for detecting the presence of polymorphic contents of polypeptides may also be used as diagnostic agents for detecting the presence of polymorphic contents may be used as diagnostic agents for detecting the presence of polymorphic contents may also be used as diagnostic agents for detecting the presence of polymorphic contents may be used as diagnostic agents for detecting the presence of polymorphic contents may also be used to down regulate expression and activity. The antibodies may also be used as diagnostic agents for detecting the presence of polymorphic contents may be used as diagnostic agents for detecting the presence of polymorphic contents may be used as diagnostic agents for detecting the presence of polymorphic contents may be used as diagnostic agents for detecting the presence of polymorphic contents may be used as diagnostic agents for detecting the presence of polymorphic contents may be used as diagn
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          RESULT 27

                                                                                                                                                                                                                                                                                                                                                                                               AAI73060 to AAI79867 represent isolated human polymorphic polynucleotide sequences (I), which contain single nucleotide polymorphisms (SNPs). AAM53114 to AAM53329 represent peptides related to human polymorphic polynucleotide sequences. The sequences can be used in gene and protein polynucleotide sequences.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     30-NOV-1999; 99US-0168138P.
